

Marwan Sherif Ahmed

Software Engineer

Cairo, Egypt | Marwansher3@gmail.com | +20 110 047 4113 | [Portfolio](#)

Summary

Software Engineer specializing in backend development with ASP.NET Core and Web API. Experienced in building secure, scalable RESTful APIs using ASP.NET Core, Entity Framework Core, SQL Server, PostgreSQL, JWT Authentication, and Clean Architecture. Skilled in Repository Pattern, Unit of Work, Dependency Injection, and SOLID principles, with additional experience building full-stack applications using Angular. Passionate about delivering maintainable, production-ready software.

Education

Bachelor of Science in Computer Science | Cairo Higher Institute | Cairo, EG | May 2024 | GPA: 3.4/4.0

Graduation Project: X-Care System Developed website and design for Doctor and Patient such as:

- Doctor profile to upload clinic details and view appointments
- Patient profile to book appointments and view latest news

Technology: Angular **Project Grade:** Excellent

Projects

Nawa Developments Platform

Technologies: React, Next.js, Tailwind CSS,

- Developed a premium real estate showcase website for Nawa Developments, featuring master-planned projects across Egypt
- Built an interactive Unit Finder with location and property specification filters
- Implemented a mortgage & installment calculator for custom payment plan estimations
- Designed a responsive, luxury-focused editorial layout with detailed project master plans and amenities showcases

[Live Demo](#)

Harlow & Finch Real Estate

Technologies: Flutter, Dart, React, Next.js, Tailwind CSS, Recharts, Firebase, REST APIs ,

- Built a synchronized real estate platform for the Dublin, Ireland market, spanning a public website, agent dashboard, and Flutter mobile app sharing live data in real time
- Developed the mobile app with location-based property search, property type filters, saved listings, and in-app chat
- Built an agent dashboard with active listings, leads, scheduled viewings, weekly traffic charts, and a live activity feed
- Integrated Firebase and REST APIs to keep website, dashboard, and mobile app synchronized in real time

[Live Demo](#)

Restaurant API

Technologies: ASP.NET Core 8 | Clean Architecture | CQRS | Entity Framework Core | SQL Server | JWT | MediatR

- Developed a production-ready RESTful API for restaurant management following **Clean Architecture** and **CQRS** principles.
- Implemented **JWT Authentication & Authorization** with ASP.NET Identity and role-based access control.
- Built complete CRUD operations for **Restaurants** and **Dishes** with pagination, filtering, and validation.
- Applied **Repository Pattern**, **Dependency Injection**, **MediatR**, and **FluentValidation** to improve maintainability.
- Integrated **Swagger/OpenAPI** documentation, global exception handling, and structured logging using **Serilog**.
- Created unit and integration tests using **xUnit** and prepared the application for **Azure App Service** deployment with **GitHub Actions CI/CD**.

[GitHub](#)

Smart Maintenance API

Technologies: ASP.NET Core 8 | Clean Architecture | Entity Framework Core | PostgreSQL | JWT | AutoMapper | FluentValidation

- Developed a field maintenance management RESTful API connecting administrators, technicians, and customers in a single platform.
- Implemented **JWT Authentication** with refresh tokens and **role-based authorization** (Admin, Manager, Technician).
- Built customer and maintenance request management modules with CRUD operations, technician assignment, status tracking, filtering, and pagination.
- Applied **Clean Architecture**, **Repository Pattern**, **Unit of Work**, and **Dependency Injection** to create a scalable and maintainable solution.
- Integrated **Entity Framework Core**, **AutoMapper**, **FluentValidation**, and **Swagger/OpenAPI** for data access, validation, object mapping, and API documentation.
- Designed the system using **PostgreSQL** with Entity Framework Core migrations.

[GitHub](#)

E-commerce Web Application

Technologies: ASP.NET Core 8, C#, Entity Framework Core, SQL Server, ASP.NET Identity, JWT Authentication, Angular

- Developed a full-stack e-commerce web application using ASP.NET Core 8 and Angular.
- Designed and implemented RESTful APIs for products, categories, orders, shopping cart, and user management.
- Implemented secure authentication and role-based authorization using ASP.NET Identity and JWT.
- Built the database using SQL Server with Entity Framework Core and Code First Migrations.
- Integrated the Angular frontend with the backend APIs to provide a responsive user experience.
- Documented and tested APIs using Swagger and Postman.

X-Care Healthcare Platform

Technologies: Angular, Tailwind CSS, REST API, Django Rest Framework

Role: Frontend Developer

- Developed Developed the frontend of a responsive healthcare web platform using Angular to enhance patient–doctor interactions.
- Implemented secure user authentication interfaces and role-based dashboards for patients and doctors.
- Built an appointment booking and management system with real-time calendar tracking.
- Integrated REST APIs from Django Rest Framework to manage medical data, appointments, and user information.
- Developed interfaces for AI-powered diagnostic tools and intelligent health chatbot features.
- Created dynamic blog and community pages for health discussions and doctor recommendations.
- Designed medical store UI for browsing and ordering prescribed medications with a user-friendly experience.

Technical Skills

Programming Languages: C#, SQL, JavaScript (ES6+), TypeScript

Frontend: Angular, HTML5, CSS3, Bootstrap, Tailwind CSS, RxJS

Backend: ASP.NET Core Web API, Entity Framework Core, LINQ

Database: SQL Server | PostgreSQL

Authentication & Security: JWT Authentication, ASP.NET Identity, Role-Based Authorization

Architecture & Design Patterns: Clean Architecture, Repository Pattern, Unit of Work, Dependency Injection, SOLID Principles

Tools & Technologies: Git, GitHub, Postman, Swagger, Visual Studio, Visual Studio Code

Development Skills: RESTful APIs, CRUD Operations, API Integration, Object-Oriented Programming (OOP), Responsive Web Design, Error Handling
